INTRODUCTION

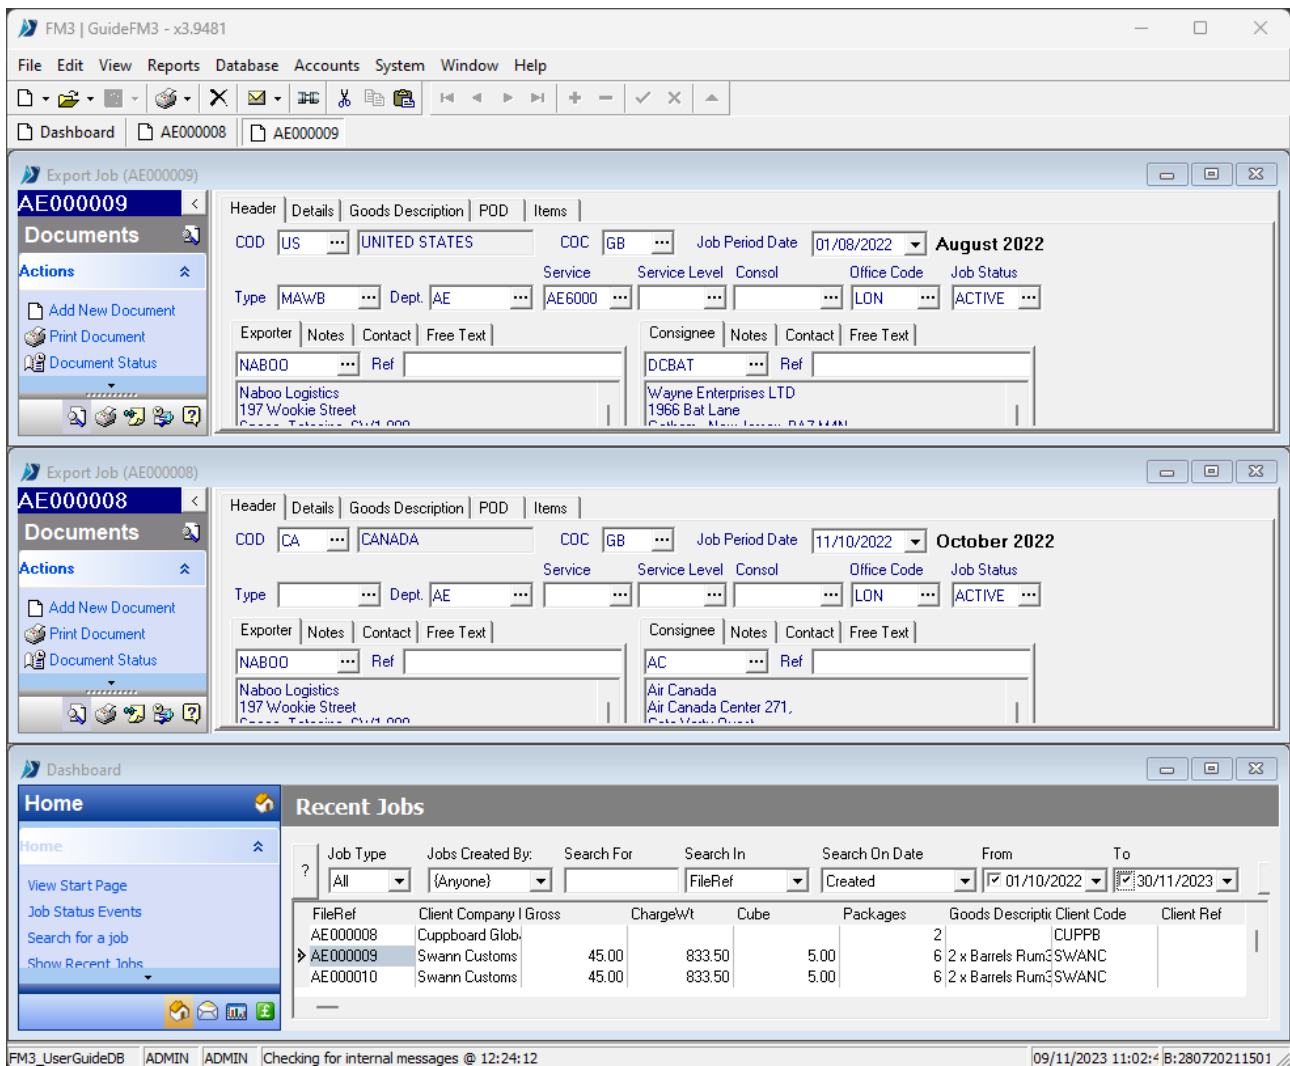

This guide will demonstrate the 'Window' tab within FM3.

Window tab

TILE HORIZONTALLY

This option will horizontally arrange the tiles.

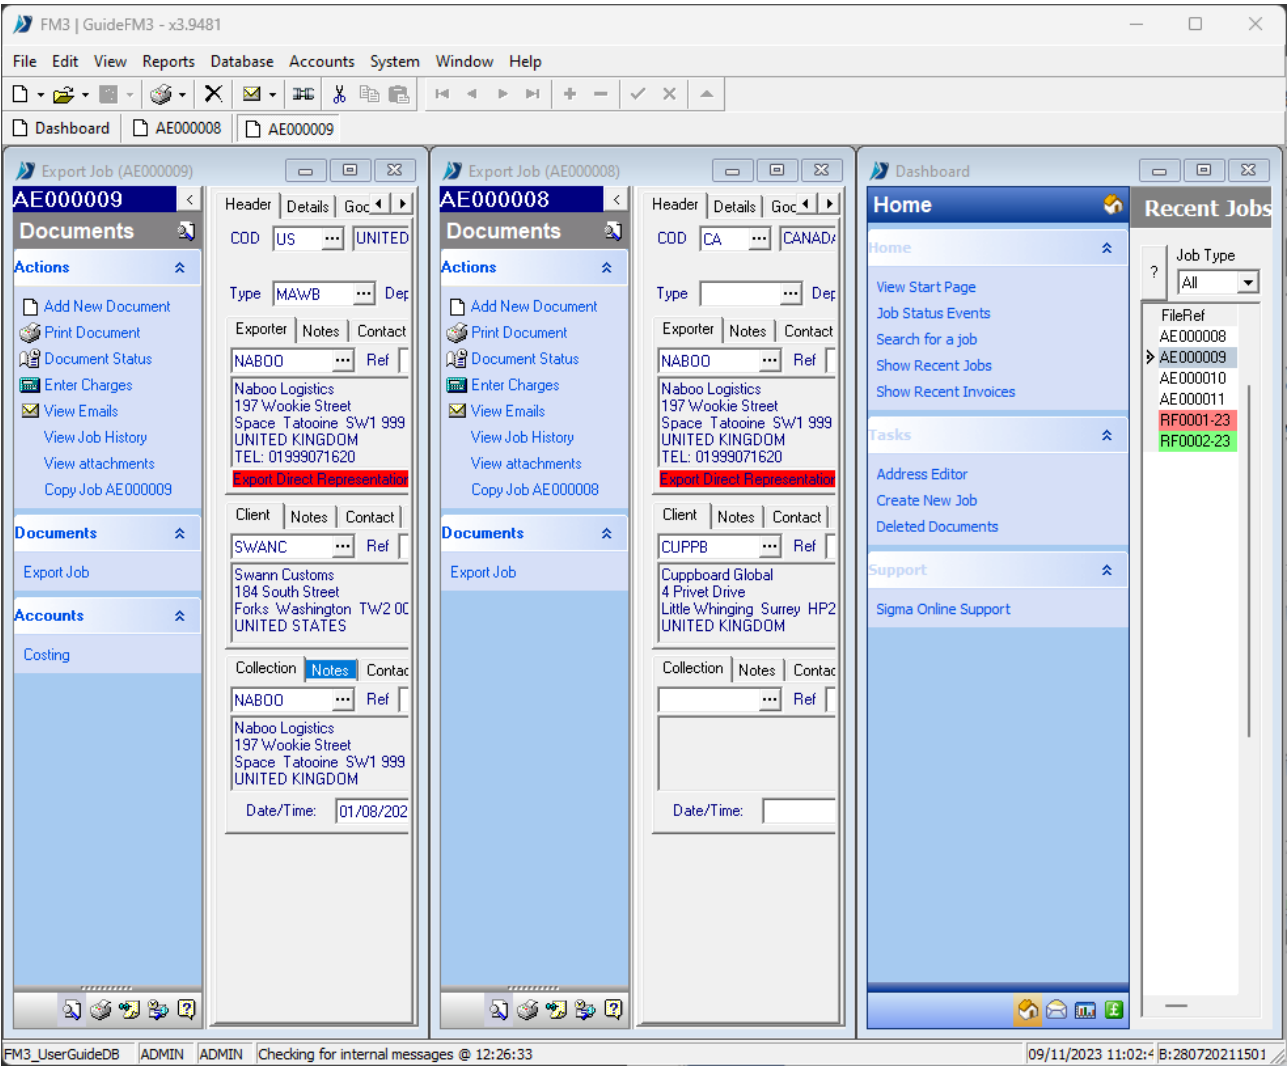

FM3 With 3 Tabs Open Horizontally

Window tab

TILE VERTICALLY

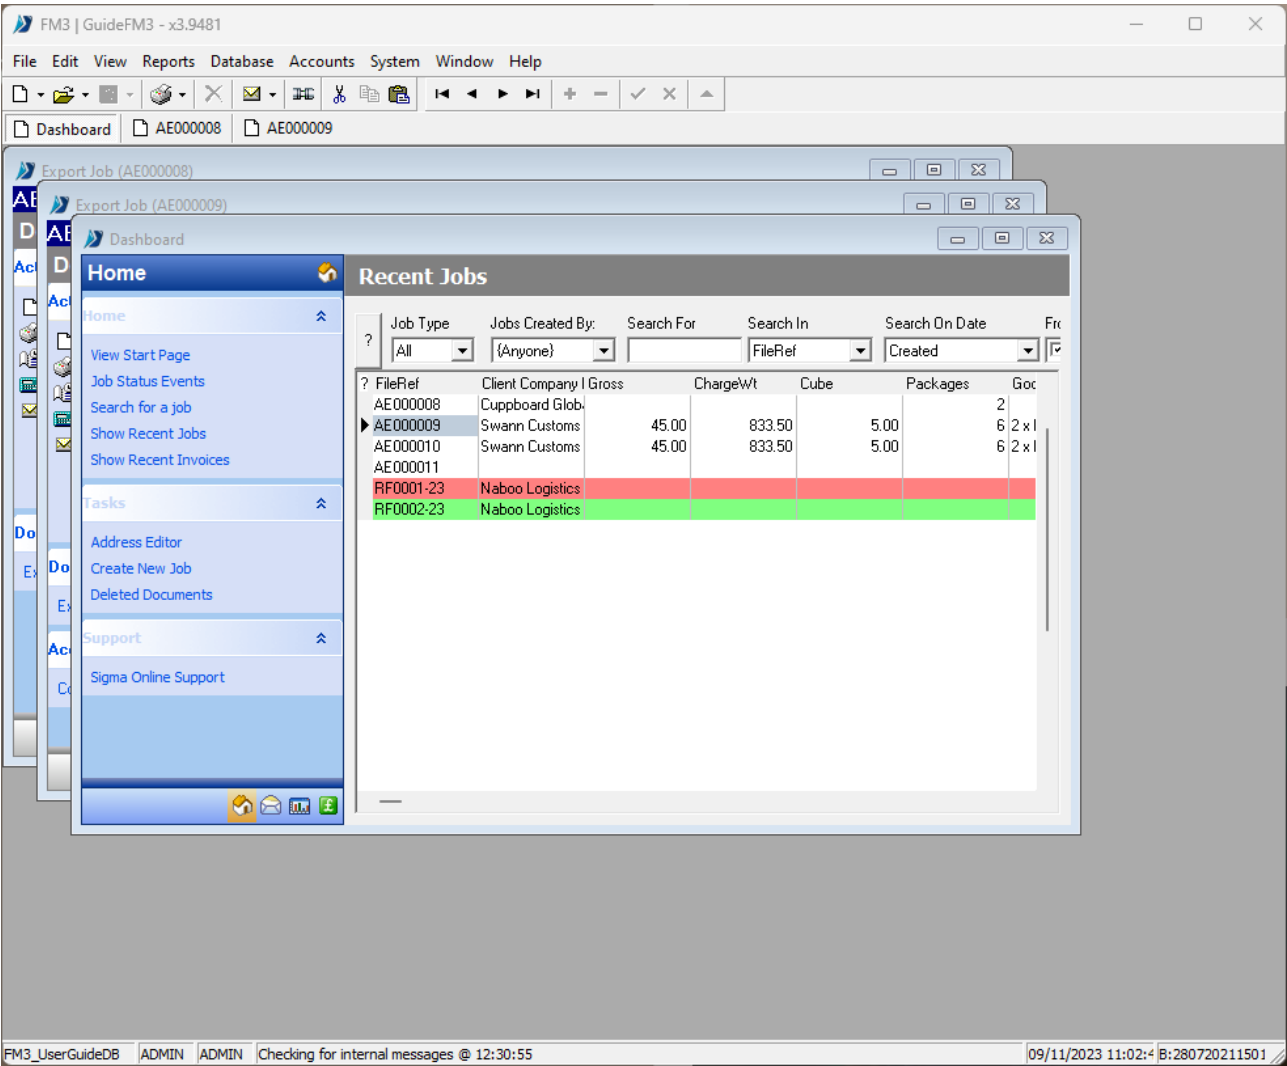

This option will vertically arrange the tiles.

Window tab

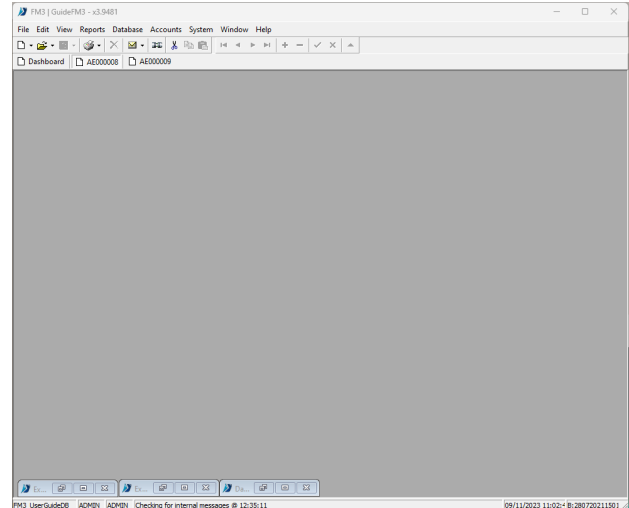

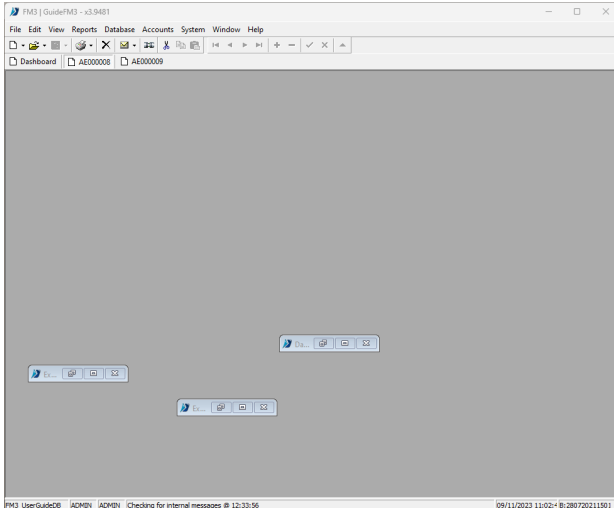

CASCADE

'Cascade' puts windows in a single stack that has been fanned out so that the window titles appear.

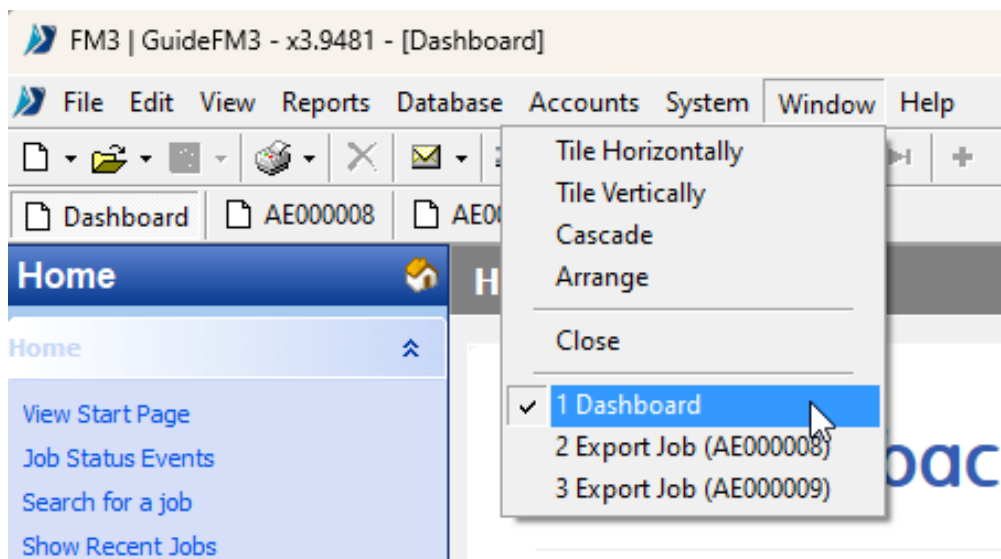

ARRANGE

When you minimize your jobs, you can drag them around as small bars. 'Arrange' literally arranged the bars as you can see in the image to the right.

1, 2, 3...

If you have a wide number of jobs open, you can always switch through them by clicking on the individual line - this will bring the selected job to the front.
